PROFESSIONAL SUMMARY

Software Developer and B.E. Cybersecurity Engineering student at J.J. College of Engineering & Technology (CGPA: 8.0), with hands-on experience in developing and deploying full-stack applications. Contributed to PragatiX, a production-ready gamified student management platform using Flutter, React.js, Spring Boot, and MySQL, implementing role-based access control, attendance management, gamification, XP, and student progress tracking. Experienced in building REST APIs, JWT authentication, database design, and secure application development. Also developed a Python-based web vulnerability scanner with Nmap integration, SQL Injection and XSS detection, and automated PDF reporting. Combines full-stack development expertise with a foundation in web security, digital forensics, and secure coding. Seeking a Software Development Internship or Entry-Level Software Developer role.

TECHNICAL SKILLS

Programming Languages	Java (Advanced), Python (Basic), SQL (Advanced), C (basic)
Backend Development	Spring Boot, Spring Security, Node.js, FastAPI, REST APIs
Frontend & Mobile	React.js, Flutter
DevOps & Tools	Git, Docker, WSL, Linux Command Line
Operating Systems	Linux (Ubuntu/Kali), Windows
Cybersecurity & DFIR	Digital Forensics (Disk & Memory Analysis), Log Analysis, Network Traffic Analysis, Wireshark, FTK, Volatility, Burp Suite, Nmap
Languages Known	Tamil, English

KEY TECHNICAL PROJECTS

PragatiX — Gamified Student Management Platform | *Flutter, React.js ,Spring Boot, MySQL*

- Developed a production-ready full-stack college management platform with role-based access control for Admin, HOD, CC, and students.
- Implemented gamification features including XP, rewards, streaks, team-based activities, and student progress tracking.
- Built attendance, discipline management, activity assignment, and automated notification modules for college-wide usage.

FitVision — Sports Talent Recognition Platform | *Flutter, Python, MongoDB, JWT*

- Led full-stack development of an Android app, handling backend APIs, database design, and security implementation.
- Implemented JWT authentication, password hashing, and secure file uploads.
- Designed talent registration, performance tracking, scholarship matching, and secure video uploads for scouting.

Automated Web Vulnerability Scanner | *Python, Nmap*

- Built a Python-based tool that automates web vulnerability assessment.
- Integrated Nmap for port scanning and implemented SQL Injection and XSS detection.
- Parsed scan outputs and generated structured PDF reports.

ACHIEVEMENTS & COMPETITIONS

- **Hackathons:** HackFinity 2025 (National Level 24-Hour Hackathon); NeuraHack 2.0 — Dakshaa T26
- **Cyber Aura'25:** 3rd Place — Cyber Hunt; 2nd Place — Debugging
- **Technical PPT Presentation:** 3rd Prize — AVC College of Engineering

EDUCATION

J.J College of Engineering & Technology, Trichy **2024 – 2028**

B.E. – Cybersecurity Engineering | CGPA: 8.0

Relevant Coursework: Secure Software Development, Web & API Security, Network Security, Cryptography, Ethical Hacking, Digital Forensics & Incident Response

CERTIFICATIONS

- Java Programming — IIT Bombay
- C Programming Training & Certification — IIT Bombay
- Ethical Hacking — NPTEL
- Introduction to Digital Forensics — Security Blue Team
